Description

Waveguide E-plane tee 650WET, operating from 1.12 to 1.7GHz with a 0.1dB insertion loss and low VSWR 1.50:1. 650WET is a three-ports waveguide connector. All the ports have standard WR650 waveguides with the same flanges FDP14(UDR14). The waveguide E-plane tees are used to separate the signal at E plane rectangular port into the collinear arm with the two rectangular waveguide ports or synthesize the signal from the two ports of the collinear arm into the E plane port.
